Nominee Name(s) and Agency:

Jan LeMay

Brief summary of reason for nomination:

Jan went above and beyond what most professionals would do in carefully documenting dozens of footwear impressions at a homicide scene.

Detailed information (attach additional pages as necessary):

Jan has served the RMDIAI in may capacities over the years and has been very helpful to many members. I could probably list a hundred of reasons for giving him this award but one is enough. Jan recently processed a homicide scene and meticulously documented over 130 footwear impressions in a dirt driveway. Many of the prints were partial and overlapping, but he was able to create a layered CAD drawing of the prints and associated a vast majority to either the suspect or first responders. He made thousands of comparisons in the case and it serves as a model of professionalism for all footwear examiners.
