“Cynthia had a fascinating presentation about the different aspects of forensic art, including drawing suspects from witness accounts, reconstructing the appearance of an individual from skeletal remains, and drawing age progressions. Her presentation had wonderful examples of illustrations that she and other forensic artists had produced. ... This was a very successful presentation and I’m so glad Cynthia was able to share her enthusiasm and expertise with us.”

Carol Ann Kearns Ph.D.
Baker Residential Academic Program
Ecology and Evolutionary Biology
University of Colorado, Boulder
